Professional Summary

Strategic STEAM Coordinator and Electronics & Instrumentation Engineer with 3+ years of experience designing and deploying interdisciplinary robotics and applied AI curricula. Expert in mentoring competitive robotics cohorts, orchestrating makerspace technical logistics, and translating advanced engineering principles—including IoT automation, computer vision, and microcontrollers—into experiential, project-based student learning.

Skills

- **Hardware & Embedded Systems:** Arduino (C++), ESP32, Microcontrollers, Sensor Integration, Actuators, VEX IQ Robotics, MODI MasterKit, IoT Systems.
 - **Software & AI/ML:** Python, OpenCV, Machine Learning Deployment, Data Science Fundamentals, HTML, CSS, Bootstrap.
 - **Instructional Tools & Design:** Tinkercad, Circuit Simulation, Project-Based Learning (PBL), MYP Design Cycle, Makerspace Safety Protocols.
 - **Productivity & Collaboration:** Git/GitHub, MS Excel, Word, PowerPoint.
-

Professional Experience

Ela Green School | MYP Design / Robotics Facilitator

July 2026 – Present

- Direct the IB MYP Product and Digital Design and Robotics curriculum, guiding student cohorts through iterative design cycles, rapid prototyping, and systems integration.
- Coordinate student research, project fabrication, and competitive evaluation submissions for national innovation platforms, including the INSPIRE MANAK Scheme.

- Integrate cross-disciplinary STEM modules combining embedded microcontroller programming, digital fabrication, and computer vision tools into middle- and upper-school coursework.

Labour India Gurukulam Public School | STEAM Coordinator & Robotics Trainer

October 2025 – June 2026

- Spearheaded and established the ongoing "Hour of STEAM" initiative, architecting station-based modular robotics labs (MODI MasterKit, VEX IQ) and training student facilitators to lead dynamic peer sessions.
- Head-coached a 6-member robotics cohort for the VEX IQ Regional Championship in Bangalore, accelerating build schedules, mechanism design, and autonomous driver programming.
- Organized and conducted advanced robotics upskilling workshops for school teachers and STEM coordinators across Palakkad and Mumbai.
- Managed technical logistics, stage infrastructure, and digital media workflows for the annual institutional learning festival.

Qwings | STEM Trainer

August 2023 – September 2025

- Mentored student innovation teams to podium placements at the international IEEE YESIST12 (Project: DOSH-WAVES) and national Big Bang competitions.
- Delivered multi-city interactive robotics and coding workshops for student cohorts across schools in Chennai and Hyderabad.
- Instructed students in hardware-software integration, electronics diagnostics, and laboratory safety protocols using Arduino and visual programming.

Education

College of Engineering, Kidangoor — B.Tech in Electronics and Instrumentation Engineering (APJ Abdul Kalam Technological University, Kerala)

(CGPA: 7.79) | Aug 2018 – May 2023

St. Berchmans Higher Secondary School — 12th Standard | 2016 – 2018

Certifications & Internships

- **Foundational Level in Programming and Data Science** – IIT Madras (Centre for Outreach and Digital Education)
 - Completed: December 2024 | Credential ID: 23F1002892.
- **AI-Machine Learning Developer (NSQF Level 7)** – ASAP Kerala in association with IIT Palakkad
 - A rigorous **756-hour government-recognized program** focused on advanced AI/ML deployment.
 - Training partner: Curvelogics | Register No: AIM22KER033.
- **Machine Learning Intern** – National Instruments Innovation Centre (LabVIEW Academy)
 - Completed a 6-week intensive program under the Electronics & Communication Engineering Department (Sept 2021 – Oct 2021).
 - Reference No: NIIC/COE/SI/AIML54.
- **Python Programming Intern** – Oracuz Infotech Pvt Ltd, Thiruvananthapuram
 - Completed a corporate development internship from April 24, 2023, to June 12, 2023.
 - Gained hands-on experience in Python applications with formal appreciation from project management.

Projects

-
- **IoT & Sensor Automation Systems:** Developed and deployed automated microcontroller projects using Arduino, integrating various analog and digital sensors to solve real-world automation challenges.
 - **Computer Vision & AI Applications:** Programmed intelligent tracking and detection applications using Python and OpenCV to demonstrate core AI/ML principles during workshops.
