Professional Summary

Strategic STEAM Coordinator and Electronics & Instrumentation Engineer with over 2 years of expertise in designing and deploying high-impact robotics curricula. Specialized in bridging advanced engineering concepts like IoT, Python, and AI with hands-on, project-based learning. Proven track record of optimizing technical logistics for large-scale events and mentoring award-winning competitive robotics teams.

Skills

- **Technical Skills (Programming/Software/Hardware):** Python, **Data Science Fundamentals**, **Machine Learning (ML) Deployment**, Arduino (C++), OpenCV, VEX IQ, MODI Masterkit, IoT Automation, Sensor Integration, Microcontrollers, HTML, CSS.
 - **Core Competencies/Soft Skills:** STEAM Curriculum Development, Project-Based Learning, Technical Logistics Management, Active Listening, Instructional Design.
 - **Tools:** Microsoft Excel, Word, PowerPoint.
-

Professional Experience

Labour India Public School – STEAM Coordinator & Robotics Trainer

Oct 2025 - April 2026

- Architected and managed an integrated STEAM curriculum for grade-wise batches, increasing student engagement through hands-on robotics and coding.
- Spearheaded cross-functional collaboration with faculty to develop structured robotics modules using VEX IQ and modular kit systems.
- Orchestrated technical logistics and digital content for the annual school learning festival, ensuring seamless program execution.

Qwings/ STEM Trainer

Aug 2023 - Sept 2025

- Instructed students in hardware-software integration, laboratory equipment safety protocols, and practical experimental techniques.
- Facilitated student teams in designing and troubleshooting innovative projects incorporating core science, technology, engineering, and mathematics principles.
- Utilized diverse teaching methodologies—including interactive lectures, live coding demonstrations, and hardware

simulations—to maximize student comprehension.

Achievements

- **Competition Victories:** Mentored student teams to winning placements at the international IEEE YESIST12 and national Big Bang competitions, demonstrating technical excellence.
- **Educational Leadership:** Launched the "Hour of STEAM" initiative at Labour India Public School, driving student immersion in coding, robotics, and design thinking.
- **Teacher Training & Professional Development:** Organized and conducted advanced robotics training workshops for school teachers and coordinators in **Palakkad** and **Mumbai**, empowering educators to integrate STEM concepts into their local curricula.
- **Multi-City Student Workshops:** Led high-impact, interactive robotics and coding workshops for student cohorts across schools in **Chennai** and **Hyderabad**, fostering hands-on engineering skills.
- **Coaching & Mentorship:** Successfully coached and prepared a 6-member student robotics team for the competitive VEX IQ Regional Championship in Bangalore, accelerating design and build schedules.

Education

College of Engineering, Kidangoor — *B.Tech in Electronics and Instrumentation Engineering* (APJ Abdul Kalam Technological University, Kerala)

(CGPA: 7.79) | Aug 2018 – May 2023

St. Berchmans Higher Secondary School — *12th Standard* | 2016 – 2018

Certifications & Internships

- **Foundational Level in Programming and Data Science** – IIT Madras (Centre for Outreach and Digital Education)
 - Completed: December 2024 | Credential ID: 23F1002892.
- **AI-Machine Learning Developer (NSQF Level 7)** – ASAP Kerala in association with IIT Palakkad
 - A rigorous **756-hour government-recognized program** focused on advanced AI/ML deployment.
 - Training partner: Curvelogics | Register No: AIM22KER033.
- **Machine Learning Intern** – National Instruments Innovation Centre (LabVIEW Academy)
 - Completed a 6-week intensive program under the

Electronics & Communication Engineering
Department (Sept 2021 – Oct 2021).

- Reference No: NIIC/COE/SI/AIML54.

- **Python Programming Intern – Oracuz Infotech Pvt Ltd, Thiruvananthapuram**

- Completed a corporate development internship from April 24, 2023, to June 12, 2023.
- Gained hands-on experience in Python applications with formal appreciation from project management.

Projects

-
- **IoT & Sensor Automation Systems:** Developed and deployed automated microcontroller projects using Arduino, integrating various analog and digital sensors to solve real-world automation challenges.
 - **Computer Vision & AI Applications:** Programmed intelligent tracking and detection applications using Python and OpenCV to demonstrate core AI/ML principles during workshops.
